 elvick.rayen@gmail.com

Motivated software engineer with strong attention to detail and organizational skills, eager to contribute to team success through effective collaboration and problem-solving. Experienced in project planning and task coordination, with a continuous drive to learn, grow, and excel in my domain.

Summary of qualifications

- Full-stack software engineer with 3+ years of experience building scalable web applications using TypeScript and modern frameworks
- Strong experience designing frontend architectures and integrating RESTful APIs within production systems
- Solid understanding of backend concepts including API design, authentication, and data flow between services
- Experienced with relational databases and writing efficient queries for data-driven applications
- Familiar with DevOps workflows using GitHub and Azure DevOps in collaborative, fast-paced environments
- Strong problem-solving skills with a focus on performance, reliability, and clean, maintainable code
- Effective communicator with experience translating technical concepts to non-technical stakeholders
- **Technologies:** TypeScript, Angular, React (basic), C#, SQL (basic), C++, Python (FastAPI), HTML, CSS
- **Languages:** Arabic, French (Delf B2) & English

Experience

Inmind.ai

Software engineer Feb 2023 – present

- Designed and developed scalable web applications using Angular and TypeScript, ensuring modular architecture and maintainable code structure.
- Integrated RESTful APIs (Python/FastAPI) and implemented role-based access control and dynamic UI rendering.
- Developed and maintained backend services using C# and .NET Core, designing RESTful APIs and handling data persistence with SQL Server, including writing and optimizing queries for performance and scalability
- Built complex, data-driven components including recursive structures, dynamic tables, and real-time state updates.
- Collaborated closely with developers, QA, and stakeholders to deliver production-ready features on schedule.

- Presented technical solutions, prototypes, and progress updates to clients and non-technical stakeholders.

Inmind.ai

Internship Trainee Aug 2022 – Oct 2022

- Frontend: Built responsive and reusable frontend components using Angular
- Devops: Utilized Docker for containerization and explored AWS cloud services and networking concepts

Eddy's Group

Full Stack Developer (Full-time) Jan 2022 – Apr 2022

- Developed and maintained web applications using Laravel
- Contributed to mobile application development using React Native
- Mentored and guided new developers while assigning and tracking tasks
- Gathered and analyzed client requirements to support project planning and development
- Presented prototypes and project progress updates to clients

Fransabank

Internship Trainee

Jul 2021 – Aug 2021

Gained hands-on experience developing applications with VB.NET and React.js through project-based work

Education

2018 - 2023

Software Engineering Student, Antonine University (UA) - Baabda

2018

Collège Notre Dame des Soeurs Antonines. Hazmieh-Jamhour

Lebanese Baccalaureate in Life Science

Licenses & Certifications

- **Cisco CCNA1** (introduction to networks)
- **Cisco CCNA2** (scaling and connecting)
- **Cisco CCNA3** (routing and switching essentials)
