Profile

Computer Science graduate with a 4.0 GPA and hands-on experience developing mobile, web, and machine-learning projects. Built applications using Flutter, React, Node.js, Python, and SQL, with a focus on practical problem-solving, usability, and reliable implementation. Seeking an entry-level computer science role where I can contribute technically and continue developing my skills.

Projects

Machine Learning & NLP Models, Python, Machine Learning, NLP

Built Python-based machine-learning models for stock-price prediction and emotion classification, covering data preprocessing, model training, and performance evaluation.

insighter - University Helper, Flutter, Dart ↗

Developed a university-helper mobile application that benefits instructors, coordinators, and students. Includes a unified group chat, role-based UI, and a solid Firebase backend.

Resonance - Music App, Flutter, Dart ↗

Developed a feature-rich cross-platform music application with streaming, downloads, local playback, music identification, playlist management, and advanced audio controls.

Stock Exchange Platform, React, SQL, Software Engineering ↗

Built a React-based stock-exchange website backed by SQL database design and managed through a structured software engineering project workflow.

Education

Bachelor of Arts and Sciences in Computer Science, Lebanese International University

- **Completed degree requirements 2026** | GPA: 4.0/4.0
- **President's Honor List** | Fall and Spring 2023-2024
- **Outstanding Undergraduate Recognition** | Spring 2025; maintained a 4.0 GPA for two consecutive years

Skills

- **Programming Languages:** Java, JavaScript, Python, SQL, Dart, HTML, CSS
- **Frameworks & Technologies:** Flutter, React, Node.js, Express
- **Tools:** Git, VS Code, JetBrains IDEs, Photoshop
- **Languages:** Arabic: Native, English: Fluent
