

HIBA SOUBRA

Software Developer – Project Coordinator

 [LinkedIn](#) |  +961 79 128 961 |  Beirut, Lebanon |  hiba.021@outlook.com

Summary

A **Software Developer at BankMed** contributing to the development of robust, user-focused financial solutions, with a growing interest in **project coordination and business process alignment**. I collaborate closely with cross-functional teams to translate business requirements into efficient, scalable applications while maintaining a strong focus on quality and usability. Driven by a passion for programming and continuous learning, I aim to strengthen the link between technology and business needs.

Education

Beirut Arab University	Beirut, Lebanon
Bachelor of Science in Computer Science	09/2020 – 06/2023
1st Place Senior Project (Health Care Management System)	

Experience

Bank Med	Beirut, Lebanon
Project Coordinator	03/2025 – Present
- Develop and maintain detailed project plans for digital banking initiatives, defining milestones, deliverables, and timelines. - Monitor project progress and ensure adherence to deadlines, and quality standards. - Coordinate with sub-project managers to track task execution and ensure timely delivery of requirements. - Identify and address potential risks or delays, implementing corrective actions when needed. - Serve as the central communication link between stakeholders, providing regular progress updates and facilitating cross-team alignment. - Support the overall delivery of the bank's digital transformation objectives through effective planning, follow-up, and coordination.	
Software Developer	11/2023 – Present
- Developed and maintained the MEDMILES web application using ReactJS, enhancing customer engagement through a seamless and responsive user experience. - Developed and maintained the OTP Verification application for the contact center using Python Flask. - Developed all notification, and banking services APIs through WSO2. - Work on Oracle Flexcube, leveraging PL/SQL to develop and implement screens for FCUBS, optimizing internal banking processes and improving operational efficiency. - Developed the CIF Flagging screen in FCUBS to enable real-time tracking and validation of customer records prior to executing any banking actions, ensuring compliance and operational accuracy. Additionally, implemented, and optimized APIs over WSO2 to seamlessly integrate the CIF Flagging system with Camunda workflows, streamlining process automation and enhancing system interoperability. - Owner of iBranch, internal Banking Application to manage and support MOF payments processing systems, ensuring accurate and timely transactions in compliance with regulatory requirements. - Designed and implemented the front-end interface for the bank's internal Real Estate Management system using React.js, developing dynamic components for data entry forms, search and filtering features, image galleries, and interactive modals to enhance user experience and workflow efficiency.	

- Gained experience in working with ASP.NET, contributing to various projects that required backend development and integration. Collaborated with cross-functional teams to align development efforts with business objectives, ensuring the delivery of high-quality banking solutions.

CCI

Beirut, Lebanon

Presales Executive / Sales Associate

08/2023 – 11/2023

- Develop and maintain relationships with new and existing customers to generate revenue for VMware Technology sales.
