OBJECTIVE

Computer Science graduate with hands-on experience in software development, IT support, and foundational Artificial Intelligence (AI) concepts. Seeking an entry-level Software Engineer or IT role where I can apply Python, Java, web technologies, and AI tools to develop reliable solutions, contribute to collaborative teams, and continuously expand my technical expertise.

EDUCATION

American University of Beirut (AUB) — B.S. Computer Science (Sept 2022 – Aug 2025)

Kuwait International English School (KIES) — High School Diploma (Sept 2015 – Jun 2021)

EXPERIENCE

Sales Intern at DHL Express Kuwait

Dec 2025/ May 2026

- Supported business development by identifying prospective import/export customers.
- Assisted with opening business accounts and coordinating customer onboarding.
- Conducted client outreach, promoted DHL services, and maintained sales lead records.

IT Intern at Al Ahli Bank of Kuwait

Oct 2025/ Nov 2025

- Resolved helpdesk tickets and supported application troubleshooting.
- Collaborated with developers to build an internal leave request application.
- Assisted in improving HR workflows and gathering system requirements.

Student Housing Monitor (AUB) Lebanon

Jun 2024/ Aug 2024

- Supervised front desk operations, ensuring accurate resident check-ins and check-outs
- Enforced dormitory policies and supported residents with day-to-day administrative needs

Project

Software Engineer (CMPS 271): Travel Planning Platform: Built a full-stack travel planner using HTML, CSS, JavaScript, Node.js, and MySQL with personalized itineraries.

Game programming (CMPS 288): Game Development: Developed a C++ OOP game featuring movement, shooting, scoring, and enemy AI.
