

RAED NABULSI

Full Stack Developer (Backend-Focused, Laravel)

Lebanon | raedelnaboulsi@gmail.com | +961 70 514 137 | linkedin.com/in/raedelnaboulsi

SUMMARY

Backend-focused Full-Stack Laravel Developer with 5+ years of experience designing scalable web applications, RESTful APIs, CMS platforms, and e-commerce integrations using Laravel, PHP, React, MySQL, Redis, and Docker. Skilled in backend architecture (MVC, OOP, SOLID), database design, performance optimization, and Laravel Filament admin panels. Leverages AI-assisted development tools to boost productivity while maintaining clean, maintainable code.

EXPERIENCE

Backend Developer — Creoshift

March 2023 – Present

- Built and optimized scalable Laravel REST APIs with Redis caching and performance profiling, improving response time by 25%
- Designed and normalized MySQL databases with proper indexing and eager loading to eliminate N+1 queries
- Developed backend for a CMS platform, implementing role-based access control and modular architecture following SOLID principles
- Integrated third-party APIs (Shopify Storefront/Admin) and mentored junior developers through code reviews
- Leveraged AI coding assistants (Claude, ChatGPT) to accelerate development while maintaining quality through peer review

Web Development Instructor — CIS College

July 2025 – June 2026

- Delivered structured training in HTML, CSS, JavaScript, and SQL using project-based learning
- Mentored students through hands-on projects and code reviews; designed curriculum aligned with industry practices

Full Stack Developer — Pixel38

October 2020 – March 2023

- Built and maintained scalable Laravel REST APIs and backend services using MVC and OOP principles
- Integrated Shopify Storefront/Admin APIs for product sync, order management, and e-commerce workflows
- Developed responsive ReactJS frontend features and reusable components integrated with backend APIs
- Designed and optimized database schemas and queries for high-traffic, data-driven applications

R&D Engineer — Celitech

April 2020 – August 2020

- Designed RESTful APIs using AWS Lambda (serverless) and TypeORM for scalable, event-driven backend services
- Implemented unit/integration testing and OpenAPI (Swagger) documentation for reliable API integrations

PROJECTS

Multi-Tenant Inventory & POS Management SaaS — Laravel 12, Filament 5, Livewire, MySQL, Docker

- Architected a multi-tenant SaaS with isolated per-tenant databases (stancl/tenancy) and separate SuperAdmin/Business panels
- Built core retail operations: POS, multi-location stock tracking, batch/expiry management, and stock transfers with audit trails
- Designed ledger system with running balances, on-account sales, and tax-rate snapshotting for immutable transaction records
- Generated 7+ exportable PDF reports and a real-time KPI dashboard; containerized and deployed with Docker to a managed MySQL backend

EDUCATION

Full Stack Development Bootcamp — Codi Tech

April 2019 – November 2019

BE in Communications & Electronics Engineering — Beirut Arab University

2013 – 2018

SKILLS

- Backend:** Laravel, PHP, Node.js, Express.js, Python, RESTful APIs, Filament, Redis, Spatie packages
- Frontend:** React, JavaScript (ES6+), TypeScript, HTML5, CSS3
- Databases & Cloud:** MySQL, MongoDB, AWS, Docker, Render, Firebase, Cloudflare
- Integrations & Tools:** Shopify APIs, Git, Postman, Sentry, Jira, Claude AI, ChatGPT
- Practices:** MVC, OOP, SOLID Principles, Design Patterns, Performance Optimization, AI-assisted Development
