Objective :

To join a professional team where I can enhance my programming and technical skills, apply my knowledge to real projects, and contribute innovative ideas and practical solutions that support the team's goals.

Education :

Lebanese University

BS in Computer Science

M1 Software engineer

Tripoli – Lebanon

2023 – 2025

2025 - 2026

- **Related Course Work:** Object-Oriented Programming(Java), Statistics & Applications, machine learning, Natural Language Processing(NLP), Distributed System(Socket, RMI)

Experiences :

Mobile Developer Intern – Xpertbot(Remote)

July 2025 - Sept 2025

- Developed and maintained mobile applications using **Flutter**.
- Implemented features such as **authentication** profile management and **API integration**.
- **Collaborated** with the **development team** to **test, debug**, and **optimize** performance.
- Gained practical experience in **State Management** and **Restful APIs**.

Freelance Application (Remote)

Nov 2025 – Feb 2026

Frontend Developer

- Developed a cross-platform mobile application using **React Native**.
- Built responsive and user-friendly **mobile interfaces UI**.
- Integrated **RESTful APIs** and implemented application features.
- **Collaborated** with clients to gather requirements and deliver solutions.
- Utilized **Git** for version control and project collaboration.

Backend Developer Intern - Eurisko (On-Site)

Feb 2026 – April 2026

- Backend internship focused on **modern backend architecture** and **scalable system design**.
- Gained hands-on exposure to **Node.js**, **Express.js** and **Nest.js** with strong understanding of backend architecture principle and **API** development.
- Worked with **advanced SQL concepts**, built knowledge in **MongoDB** including **aggregation pipelines** and **NoSQL fundamentals**.
- Explored **caching strategies**, **microservices architecture**, **Domain-Driven Design (DDD)** and **Event Streaming in distributed systems**.

Freelance Application (pharmas - Remote)

May 2026 – July 2026

Backend Developer

- Developed a pharmacy management system using **Java Spring boot**, **PostgreSQL**, and **50+ RESTful APIs**.
- Implemented a **layered architecture (Controller, Service, Repository)** following Spring Boot best practices.
- Built **secure authentication** using **Spring Security**, **JWT** and role-based access control.
- Developed **AI-powered features**, real-time notifications, and location-based services.
- Tested APIs using **Postman** and utilized **Git** for version control.

Projects :

Sport Booking Web Application – Academic/Personal Project

Feb 2025

Full Stack Developer

- **Developed** a web application for **booking** and **managing sports sessions**.
- **Implemented** features to **create** and **manage** sports sessions, including sport name, schedule, duration, and available days.
- **Built dynamic interfaces** to display, update and manage scheduled sessions.
- **Implemented** session deletion functionality and secure user authentication(sign-up).
- Integrated a **React**-based frontend with **PHP** backend to ensure full-stack functionality.

Skills: React, JavaScript, PHP

CityConnect – Hackathon Project:

Dec 2025

Frontend Developer

- **Developed the frontend** of a municipal platform enabling citizens to report local issues such as road damage, traffic congestion, and infrastructure problems.
- Built **responsive** and user-friendly interfaces for submitting issue details and uploading images.
- **Collaborated with team members** to integrate frontend components with backend services and APIs.
- Focused on **usability, accessibility** and **intuitive user flow** to improve communication between citizens and municipalities. Project built with **React**.

FemaleCoffee Website – Software project

Feb 2026 – April 2026

Full Stack developer

- **Developed a responsive** and **reusable website** template allowing users to customize content, images, and layout it without coding knowledge.
- **Built a full-featured web application** for browsing products, place orders and managing a shopping cart.
- Implemented dynamic pricing logic with total calculation based on selected items and quantities.
- **Developed** an event management feature allowing users to view, join, and reserve spots for coffee events.
- Designed a promotional system where users receive discounts based on number of orders.
- **Skills:** React, Nodejs, CSS tailwind.

Guardian AI _ AI-Powered Emergency Response Platform

15 July – 21 July 2026

Kanz AI Training Hackathon Project

Website: <https://guardian-angel-ai-18.lovable.app/>

- Developed an **AI-powered emergency response web application** by **Lovable** that helps users during critical situations through a multi-agent workflow.
- Enables users to **create a secure emergency profile**, manage trusted family members, activate an emergency mode and generate emergency reports.

Skills :

Programming Language : Java, Java Spring boot, SQL, JavaScript, html, CSS, PHP, MySQL, React, NodeJS, python, React Native, Flutter, Docker, RESTFul API, PostgreSQL, Git / GitHub, MongoDB.

AI Tools: Claude Code, Replit, Lovable, miniStudio, NotebookLM, Gemini.

Soft skills: Communication, Organization, Teamwork, Time Management, Problem solving.

Languages :

Arabic(native) | French(basic) | English(intermediate)
