AREAS OF EXPERTISE

Adaptability Quick Learner Collaboration Team Management Multitasking Problem Solving Bilingual Agile
AI Agents Workflow Automation Jira n8n UI/UX APIs JavaScript TypeScript Angular React Python

PROFESSIONAL EXPERIENCE

AI Agent Engineer

CXG - Dubai, United Arab Emirates

April 2026 - Present

- Built enterprise automation pipelines integrating business systems and collaboration platforms.
- Designed and deployed AI-powered agents to automate cross-functional business workflows at scale.
- Collaborated with stakeholders to identify automation opportunities and deliver measurable business outcomes.

Senior Web Developer | Senior Automation Developer

Waimakers - Amsterdam, Netherlands

September 2025 - Present

- Led implementation of complex product features across a shared monorepo architecture.
- Translated business processes into automated solutions, reducing manual effort and operational bottlenecks.
- Designed and developed reusable automation components to accelerate delivery and improve maintainability.

Technical Consultant (part-time)

Weave Wider - Beirut, Lebanon

September 2024 - July 2025

- Provided mentorship and technical leadership through code reviews and best practices.
- Implemented a multi-layered Jira setup with advanced workflows, automation, and scalable project structures.
- Introduced process automation tools for code linting, formatting, Git hooks, and streamlined branch workflows, significantly enhancing code quality and developer productivity.

Senior Full-Stack Developer (project-based)

Soft Chaos - Dubai, United Arab Emirates

June 2024 - July 2025

- Engineered a full-stack web app enabling real-time drone control via Angular and WebSocket integration.
- Built scalable APIs with Python (FastAPI) to ensure seamless communication between front-end and backend.
- Designed and implemented responsive UI/UX for drone operations, ensuring intuitive and efficient interactions.

Senior Front-End Developer

Nextcare - Beirut, Lebanon

October 2023 - December 2024

- Created smart caching and tab sync solutions, boosting user experience and responsiveness.
- Led performance refactoring and bug fixes, significantly enhancing application efficiency and stability.
- Automated Jira ticket creation via n8n, converting support/QA emails into tickets using unique IDs and email subjects, and auto-assigning to the team leader.

EDUCATION

Bachelor of Science in Information Technology

American University of Technology, Lebanon

September 2016 - October 2019
