SUMMARY

Computer Science graduate specializing in ASP.NET Core and C# development. Experienced in designing and deploying full-stack web applications using Entity Framework Core, PostgreSQL, REST APIs, Docker, and Clean Architecture through multiple real-world projects.

PROJECTS

AI CV Analyzer

May 2026 – Jun 2026

- Architected and developed an AI-powered CV analysis and job matching platform using ASP.NET Core Razor Pages, Entity Framework Core, PostgreSQL, and OpenAI APIs.
- Designed secure authentication and authorization using ASP.NET Core Identity with role-based access control.
- Integrated AI services for CV analysis, skill-gap detection, and career recommendations.
- Developed REST APIs to support document processing and AI workflows.
- Applied Clean Architecture, SOLID principles, and dependency injection to improve maintainability.
- Deployed the application to cloud infrastructure using Docker.
- Tech Stack: ASP.NET Core, C#, EF Core, PostgreSQL, OpenAI API, Docker, Git
- Live Demo: <https://ai-cv-analyser-r4t6.onrender.com>

Barber Salon Management Platform

Jul 2026

- Designed and implemented a complete barber salon management platform supporting customers, employees, and administrators.
- Built appointment scheduling with booking conflict prevention and employee availability management.
- Developed product management, order processing, payment, and inventory modules.
- Implemented secure authentication using ASP.NET Core Identity.
- Designed relational database models using Entity Framework Core and PostgreSQL.
- Applied Clean Architecture and dependency injection to separate business logic from presentation.
- Tech Stack: ASP.NET Core 8, C#, Razor Pages, EF Core, PostgreSQL, Docker & Docker-Compose
- Live Demo: <https://barber-salon-booking-platform.onrender.com>

Foodie | Restaurant Management System

Feb 2026 – May 2026

- Developed a restaurant management platform supporting ordering, authentication, and online payments.
- Implemented shopping cart and order management modules.
- Designed RESTful backend services and database schema using Entity Framework Core.
- Built responsive user interfaces using Bootstrap.
- Integrated payment processing and role-based authorization.
- Tech Stack: ASP.NET Core, EF Core, PostgreSQL, Bootstrap , Docker
- Live Demo: <https://restaurantsystem-zk25.onrender.com/Home>

TECHNICAL SKILLS

- **Back-End:** ASP.NET Core, C# ,Clean Architecture , Entity Framework Core, REST APIs, Authentication & Authorization,Dependency Injection
- **AI & Data:** Claude ,OpenAI API,Machine Learning, NumPy, Pandas
- **Front-End :** JavaScript , CSS3, Bootstrap, React, Responsive Design, AJAX
- **Databases:** PostgreSQL, SQL Server, MySQL
- **Tools:** Git, GitHub, Docker, Visual Studio, VS Code, Figma , Jira
- **Programming Languages:** C#, Java, Python, JavaScript, PHP, C

EDUCATION Sept-

2023 to Jul-2026

Lebanese University (LU)
Faculty of Sciences

Bachelor's Degree in
Computer Science

Hadath, Lebanon

LANGUAGES

- **Arabic:** Native
- **English:** Advanced
- **French :** Advanced
