

Naveed Sohail Gung

Full-Stack, Mobile & Infrastructure Engineer

Beirut, Lebanon | +961 76986034 | naveedsohailg@gmail.com

[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-Stack, Mobile & Infrastructure Engineer with hands-on experience across enterprise web platforms, mobile applications, ERP/Odoo workflows, dashboards, and cloud/Linux-based deployments. Skilled in MERN, LAMP, .NET, SQL, React Native, Flutter, Docker, GitHub Actions, and bilingual Arabic/English systems with RTL/LTR support. Currently on extended contract at Auvia Groups, contributing to production web systems, business workflows, AI-assisted tooling, Odoo CRM configuration, QA, and technical documentation.

EXPERIENCE

Auvia Groups — Frontend & Mobile Developer Intern → Full-Stack Engineer — Beirut, Lebanon
2025 – Aug 2026

Aug

Started as a Frontend & Mobile Developer Intern and was promoted/extended after the internship into a contract Full-Stack Engineer role supporting production enterprise systems.

- **Frontend & Mobile Developer Intern (Aug 2025 – Nov 2025):** Worked on NDA-covered internal and client-facing projects, supporting frontend UI implementation, mobile development tasks, testing, documentation, and early ERP/Odoo workflow exposure.
- Developed responsive frontend components, supported mobile UI implementation, debugging, integration testing, and feature validation across web and mobile systems.
- Contributed to two mobile application projects, including speech-to-text/text-to-speech functionality and facial analysis features, while advising the AI development team on UI structure, component design, and implementation approach across Odoo web and Flutter mobile builds.
- **Full-Stack Engineer — Contract (Nov 2025 – Present):** Promoted/extended after the internship to contribute to production enterprise systems, ERP/Odoo workflows, dashboards, and client-facing web platforms.
- Build and maintain full-stack modules using .NET, C#, Angular, REST APIs, and SQL-backed business logic.
- Customize Odoo CRM workflows, models, fields, views, access rules, automated actions, and client-specific modules to support real business operations.
- Implement bilingual Arabic/English interfaces with RTL/LTR support, and work on authentication, RBAC, API integrations, pagination, filtering, caching, QA, documentation, deployment preparation, environment configuration, code reviews, debugging, and AI-assisted development workflows.

MERN Stack Developer ITSC — Remote

Feb 2025 – Apr 2025

- Delivered two production-style full-stack web applications, including admin dashboards and a learning management system, using React, Node.js, Express, and MongoDB.
- Designed REST APIs, MongoDB data models, authentication flows, and role-based access control for admin, instructor, and student user groups.
- Handled requirements gathering, implementation planning, QA testing, technical documentation, and deployment preparation across both projects.
- Improved usability and backend efficiency through pagination, search and filtering, input validation, optimized data loading, and cleaner admin workflows.

Freelance Front-End Developer · PWR Store (Client Project)

2025

- Built a responsive client e-commerce platform for digital products, supporting subscriptions, pricing tiers, cart, wishlist, product browsing, and dynamic routing.
- Implemented bilingual Arabic RTL and English LTR layouts, SEO improvements, PWA capabilities, lazy loading, and code splitting to improve accessibility and performance.
- Created reusable, animated UI components with React, TypeScript, Tailwind CSS, Vite, and Framer Motion for a polished customer-facing experience.
- Configured deployment workflow with environment variables, build optimization, Netlify hosting, and post-launch monitoring to support stable delivery.

CORE COMPETENCIES

Frontend	React.js · Angular · Blazor · Nuxt.js · Three.js · Tailwind CSS · Framer Motion · Flutter · React Native
Backend	Node.js · Express · .NET · C# · PHP · Laravel · REST APIs · RBAC
Database	PostgreSQL · MySQL · MongoDB · Firebase · SQLite
Mobile	Flutter · Dart · Firebase · Android development
ERP	Odoo CRM · ERP workflows · CRM systems · Procurement workflows · LMS platforms · Dashboards
Cloud/Infrastructure:	Linux · Docker · Nginx · PM2 · GitHub Actions CI/CD · AWS basics · Azure basics · Netlify · Render
AI / Security:	AI-assisted development · RAG concepts · AI agents · Chatbots · Cybersecurity fundamentals · Threat detection concepts
Human Languages	Arabic (Native) · English (Fluent) · Urdu (Fluent)

PROJECTS

Project	Description	Stack
EduFlow	Built an e-learning platform with course management, assessments, video content, authentication, admin dashboard, and learner progress tracking.	MERN Stack
BAZAAR	Built an e-commerce platform with product listings, cart, checkout flow, authentication, admin features, and performance-focused UI.	MERN Stack
Botanika CRM	Windows desktop CRM app with a companion website, both sharing one live Firebase database.	C# · WinForms · .NET · Firebase
Code-Playground	Browser-based IDE: write, run, and preview code in multiple languages in real time.	React · Node.js
Elite Showroom	Luxury car showroom with interactive 3D visuals and glassmorphic UI.	React · Three.js · Blender
Jenny	AI chat app with a 3D animated avatar, real-time responses, and text-to-speech.	React · Three.js · Node.js · MongoDB
Monolith	an offline-first Flutter music player built for local listening, managed downloads, playlist control, and system-grade playback surfaces across Android and iOS.	Flutter
EmotionSense	Real-time facial emotion, age, and gender detection with advanced ML models A privacy-first Flutter application combining Google ML Kit face detection with TensorFlow Lite models for comprehensive facial analysis	Flutter · TensorFlow Lite
S.T.A.R	System-level security monitoring tool for detecting rootkits and memory anomalies.	C · Electron · SQLite

EDUCATION

B.S. Management Information Systems

MUC College — In Progress (2026)
Technical Diplomas — HBC / CIS College

CERTIFICATIONS

Full Stack Web Development — Johns Hopkins / Coursera
AWS Technical Essentials
Cybersecurity Fundamentals — Cisco
Foundational C# — Microsoft · PreSecurity — TryHackMe
Claude Code in Action · Intro to Subagents · Agent Skills — Anthropic
JavaScript · Python · C# · Responsive Web Design — FreeCodeCamp
