PROFESSIONAL EXPERIENCE

Supply Chain Specialist

May 2026 – Present

MOWI — Norway (Hybrid)

- Analyze and optimize end-to-end supply chain processes across Infor M3 ERP, Infor WMS, OTM, and Infor ION.
- Translate operational requirements into functional designs and coordinate UAT, deployment, and production support for system enhancements.
- Validate and troubleshoot ASN, picking, shipment, inventory, and transportation integrations between M3, WMS, and OTM.
- Develop SQL queries and Infor Birst reports to monitor warehouse performance, validate data, and support operational decisions.
- Collaborate with global business and technical stakeholders to perform root-cause analysis and deliver continuous process improvements.

Functional Specialist – WMS Implementation

Dec 2023 – Apr 2026

Supply Network Solutions (SNS) — Beirut, Lebanon

- Led end-to-end WMS implementation projects for clients across Lebanon, the US, Europe, and the UAE, managing scope, timeline, and resources through to successful deployment and adoption.
- Managed full project lifecycle for Supply Chain solution rollouts, coordinating process optimization and system integration across cross-functional teams.
- Translated client business requirements into functional designs, prototypes, and system configurations, ensuring alignment between technical delivery and business goals.
- Developed project plans, cost estimates, and delivery timelines to ensure on-time, on-budget execution.
- Facilitated stakeholder workshops to define project scope, gather requirements, and align priorities across client and internal teams.

Functional Consultant

Jun 2022 – Dec 2023

Supply Network Solutions (SNS) — Beirut, Lebanon

- Delivered end-to-end implementation consultancy in Supply Chain and Warehouse Management, analyzing current-state operations and leading gap analysis to identify and implement process improvements.
- Partnered with stakeholders to develop Functional Requirements and Standard Operating Procedures (SOPs), improving operational control and process alignment.
- Authored comprehensive project and system documentation, including user manuals, and led validation, training, and post-go-live support activities.
- Contributed to multiple concurrent implementation projects across diverse industries, adapting solutions to meet client-specific and market requirements.
- Performed data analysis using SQL to generate insights that informed project decisions and supply chain process optimization.

Pre-Sales Consultant

Dec 2020 – Jun 2022

Integrated Digital Systems (IDS) — Beirut, Lebanon

- Presented product and implementation solutions to prospective clients, supporting the transition from sales to project kickoff.
- Partnered with sales and delivery teams to prepare project proposals, scoping documents, and solution demonstrations.
- Gathered client feedback and market insights to guide product and implementation-approach enhancements.
- Developed user manuals and onboarding materials to support client implementation and adoption.
- Designed client engagement strategies that improved satisfaction and set the foundation for successful project delivery.
