💼 EXPERIENCE

AIY Expert Solutions

Software Development Apprentice

10/2025 – 01/2026 | Tripoli, Maarad

- Worked as a Software Development Apprentice on multiple projects, including an email generation system
- Built backend services and desktop apps using Node.js, Express, REST APIs, and Electron
- Developed side projects using tools like Puppeteer to expand technical skills
- Gained experience in full-stack development and team collaboration

📁 PROJECTS

MedRelay

MedRelay is a system that helps address medicine shortages by prioritizing urgent deliveries to healthcare facilities, improving supply efficiency and patient care.
(<https://medrelay-gilt.vercel.app/> 📄)

Built a responsive dashboard in Next.js and React with TypeScript, styled with Tailwind CSS and shadcn/ui on Radix primitives. Analytics with Recharts, type-safe forms via React Hook Form + Zod, light/dark theming, and page transitions with Framer Motion. Auth and data on Supabase (SSR); deployed on Vercel.

Google Email Generation

Built a Node.js automation tool using Puppeteer to create Gmail accounts with phone verification, integrating HeroSMS API and proxy rotation across 36+ countries, with CAPTCHA handling and error recovery.

Byte Ryte

ByteRyte is a secure password manager that encrypts and stores passwords, generates strong unique ones, and lets users access everything with a single master password, improving overall account security.
