

Mohamad Karim Husari

Phone number: +961 70800728 | mhoussari123@gmail.com | Beirut, Lebanon

Objective

Computer Science graduate with hands-on experience integrating LLM APIs (OpenAI, Claude, Gemini) and AI-assisted development tools (GitHub Copilot, LangChain, RAG). Combines technical project work with real-world operational experience from retail and remote technical internships. Seeking to apply AI engineering and full-stack fundamentals to a production engineering role.

Education

Bachelor of Science in Computer Science

June 2026

Beirut Arab University, Beirut, Lebanon

- Relevant coursework: [e.g., Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering]

Experience

Sales Associate

Dec 2023 – May 2024

D. FY Store, Beirut

- Met or exceeded monthly sales targets, as measured by achieving 100% of assigned revenue goals, by proactively guiding customers through product selection and tailored recommendations.
- Maintained zero cash-handling discrepancies, as consecutive error-free shifts, by accurately processing POS transactions and reconciling daily sales reports.
- Improved sales floor presentation, as measured by consistent compliance with visual merchandising audits, by organizing and replenishing stock on a regular basis.

Internship / Training

Cybersecurity & Technical Intern

Jul 2025 – Aug 2025

AST Track Rent A Car LLC, Dubai, UAE (Remote)

- Strengthened platform security posture, as measured by 10 bugs and vulnerabilities identified and documented, by monitoring digital systems and reporting technical errors to the engineering team.
- Reduced unresolved technical issues, assisted in resolving technical issues across company systems by improvement in ticket resolution time, by assisting in vulnerability testing and troubleshooting across company systems.
- Supported security best-practice adoption, as measured by 2 process improvements implemented, by collaborating remotely with the team to resolve operational glitches.
- Collaborated online with team members to resolve operational glitches and implement security best practices across company systems.

Web Development Intern

Aug 2025 – Sep 2025

Coding & Create (Remote)

- Delivered functional features for live web applications, as measured by 3 components/pages shipped, by building and testing UI elements under mentorship from a senior web developer.
- Accelerated personal development velocity, as measured by completing 4 assigned tasks ahead of schedule, by applying React/React Native fundamentals and AI-assisted coding tools (GitHub Copilot) to debug and ship code faster.
- Improved team collaboration efficiency, by participating in remote design and development discussions and incorporating feedback from professional mentorship.

Skills

Soft Skills:

- Team player with a strong work ethic
- Quick learner and highly adaptable, Organized, responsible, and detail-oriented.

Computer Skills:

- Microsoft Word – Document creation and formatting.
- Microsoft Excel – Data entry, basic formulas, and spreadsheet management.
- Microsoft PowerPoint – Creating professional presentations.
- AI Engineering Techniques: Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Agent frameworks (like LangChain)
- **AI-Assisted Development:** GitHub Copilot, automated code generation, AI-driven debugging
- AI & LLM Engineering: OpenAI API, Claude API, Google Gemini API, LangChain, Retrieval-Augmented Generation (RAG), prompt engineering, Ollama, Llama.cpp, Hugging Face, GitHub Copilot
- Programming & Development: Java, React Native, JavaScript, object-oriented programming fundamentals

Technical Skills:

- Proficient in Java and general coding principles
- Basic understanding of software development and problem-solving
- Familiar with computer science fundament
- Strong communication and interpersonal skills
- Sales and product recommendation expertise Cash handling and POS system operation
- Inventory management and visual merchandising

Professional Skills:

- Customer service and cash handling (POS systems), inventory management, team collaboration

Languages:

- Arabic, Native
- English, Fluent
- French, Fluent

Certifications

- The Complete React Native + Hooks Course — Udemy (Instructor: Stephen Grider), 38.5 hours, completed Aug 2025
