CAREER SUMMARY: SOFTWARE DEVELOPER

A self-motivated and enthusiastic person experienced in software / Apple mobile development and startup ecosystem. Aside from my part-time job, I am currently a self-employed freelance software developer readily involved in undertaking projects.

I eagerly connected the dots between domains such as software development, project management, and business analysis. I believe my technical skills within mobile technology will add value to your business and optimize efficiency throughout the tailoring user experience.

Key software skills include:

- Apple mobile development (**Swift 5** and **SwiftUI**)
- Flutter for hybrid app development
- Web development & design (Mainly **WordPress & PHP**)
- Computer networking and APIs (**Web services**, mainly RESTful architecture)
- Database systems development (mainly **RDBMS**) and business logic (mainly **PHP**)
