Summary

I am a skilled software engineer that can design any project from conception to completion. I have been in the software industry for approximately 3 years as a freelancer and a contractual employee. I have proficient skills in debugging, problem solving, complex coding, design and integration. I am highly equipped in developing business plans, requirements specifications, user documentation, and architectural system research. Efficient at writing clean codes, and constantly updating knowledge on software coding and technological advancements.

- •Radical Fitness, TopRide Official Trainer

- •Lebanese Red Cross, Certificate of Completion of Basic Cardiac Life Support

Experiences

Excite Design Interactive
February 2018 - Present, Software Engineer

Responsible for writing server-side web application logic, developing back-end components, connecting applications with other (often third-party) web services, whilst supporting my front-end job by integrating my work with the application. In addition to this, I develop and integrate plugins for certain popular frameworks like wordpress, drupal and custom CMS.

Multiframes
September 2017 – January 2018, Full Stack Web Developer

Responsible for managing back-end services and the interchange of data between the server and the users. My primary focus was on the development of all server-side logic, definition and maintenance of the central database, and ensuring high performance and responsiveness to requests from the front-end. Also responsible for the integration of the front-end elements established into the application.

Nova4
April 2017 – September 2017, Front End Web Developer

Wrote well designed, testable, efficient codes by using best software development practices. Created website layout/user interfaces by using standard HTML/CSS/JQUERY practices. Responsible for the the visual elements that users are exposed to and interact with in a web application.

Freelance
March 2016 – Present, Full-Stack Web developer

Responsible for both, the client side and the dynamic interactive portion of a website. Accomplished in developing front-end using web fundamentals like html, javascript, css, and frameworks like angularJs. Furthermore, established the data-driven servers of an application that power site functionality from behind the scenes using: php, javascript, and database technologies like MySQL. efficient in carrying all projects from conception to completion.

Le66 concept store - Tabet Group - ABC Dbaye
September 2016 - August 2016, Senior Sales

Supported the management team in leading and motivating the store team to maximize sales potential and provide our customers with the right product knowledge and products to ensure customer satisfaction.

Sports Experts Company - ABC Achrafieh
November 2015 - June 2016, Sales Associate

Responsible for the marketing of the company through the sales department of their goods while monitoring business and gathering current marketplace information on products.

Total Company - Achrafieh
August 2015 - September 2015: IT Intern

Responsible for the servers and the internet connection between the company and its branches ensuring they are in parallel to the main head office. In addition to responding to user requests for services, troubleshoot problems and helping to develop solutions.

Holdal Abou Adal Group - Dekweneh
July 2014 - September 2014, IT Intern

Responsible for providing direct technical assistance and support to company staff for network, hardware and software issues. Monitoring systems and procedures to ensure data security.

Joseph Eid - ABC Achrafieh Mall
