EDUCATION

Al-Maaref University

Bachelor of Computer Science

Beirut, Lebanon

Sep. 2022 – Sep. 2025

- **Cumulative GPA:** 3.39/4.0
- **Relevant Courses:** Object Oriented Programming, Data Structures, Operating Systems, Algorithms, Database, Web Development, Computer Networks, Machine Learning, Computer Security

EXPERIENCE

42 Beirut

Piscine (C Programming Intensive)

Beirut, Lebanon

Sep 2025 – Oct 2025

Completed a month-long immersive program focused on algorithmic problem-solving, C programming, and peer-to-peer learning in a highly collaborative environment.

Youbee.ai

Cybersecurity Bootcamp

Beirut, Lebanon

June 2025 – Sep 2025

- Completed a 3-month intensive program covering network security, ethical hacking, and incident response.
- Conducted a hands-on penetration testing project simulating real-world attack scenarios.
- Strengthened practical cybersecurity skills through applied labs and team-based assessments.

Technical Projects

Tareeq | Flutter, Dart, Laravel, Google Maps API, Firebase, SQL, Git, Stripe, Tailwind

- Developed a **bus transport app for Lebanon** using **Flutter**.
- Implemented **live user location updates** using the **Google Directions API**.
- Integrated **real-time bus tracking** using **Firebase**.
- Designed an **intuitive route visualization system** with **polylines**.
- Implemented **authentication and role-based access control** using **Laravel Sanctum** with **2FA authentication**.
- Developed a payment system using **Stripe** and QR code ticket generation.
- Built an admin dashboard to manage the app as a web platform using **Laravel** and **Tailwind CSS**.

GitHub: <https://github.com/AliYahFouFi/Tareeq>

BeyHome | Laravel, PHP, HTML, CSS, JavaScript, Bootstrap, SQL, Git

- Developed a **full-stack home rental platform** using **Laravel & PHP**.
- Integrated secure **user authentication** and dynamic **property management**.
- Designed an **intuitive booking system** for seamless reservations.
- Implemented **interactive maps** using **Leaflet.js** for enhanced user experience.
- Built an **admin dashboard** to streamline property and user management.
- **GitHub:** <https://github.com/AliYahFouFi/WEB-BeyHome>

Markit-Link(in-progress) | Laravel, React, PHP, CSS, MySQL, JWT

- Built a modern marketplace platform enabling users to buy, sell, and chat in real time.
- Implemented secure **JWT authentication** for login, registration, and protected routes.
- Developed real-time chat between buyers and sellers using **Socket.IO**.
- Integrated image hosting via **ImgBB API** for product uploads.
- Implemented search, filtering, and category-based browsing to improve user experience.
- Built **RESTful** Laravel API endpoints with validation, relationships, and error handling.
- **GitHub:** <https://github.com/Zulfikaryehya/marketlink>

TECHNICAL SKILLS

- **Programming Languages:** C, PHP, JavaScript, Dart, Java, Python, SQL, HTML, CSS
- **Frameworks & Libraries:** Laravel, Flutter, React, Express.js, Tailwind CSS, Bootstrap
- **APIs & Services:** RESTful APIs, Google Maps API, Firebase
- **Tools & Databases:** Git, GitHub, Postman, MongoDB, MySQL
- **Development Practices:** Agile Methodology, SDLC, MVC Architecture
