

# Ali Rida Darsa

## Full Stack Developer

✉ alialridaaldarsa@gmail.com ☎ 76816079 📍 Beirut, Lebanon 🌐 LinkedIn 🐙 GitHub

### PROFILE

---

Full Stack Developer, I have a solid background in building web applications with Java and Spring Boot for the backend, as well as with React, .NET, and Flask. My interests span the full stack from sculpting user interfaces to API and database design. Along the way, I have taken on team leadership roles, handled code reviews, and managed project workflows. I am passionate about creating friendly user experiences with the systems and solutions I build, optimizing them for scalability and performance while solving real-world challenges leveraging new tools.

### SKILLS

---

#### Frontend Development

- **Languages:** HTML, CSS, SCSS, JavaScript, TypeScript
- **Frameworks/Libraries:** React.js, Three.js, Vite
- **UI Libraries:** Bootstrap, Material UI, Tailwind CSS

#### Backend Development

- **Languages:** C#, Java, Python
- **Frameworks:** Spring Boot, Spring Framework, ASP.NET ⚡ Core, Flask
- **Data Access:** Spring Data JPA, Hibernate
- **API & Authentication:** RESTful APIs, Spring Security, ASP.NET ⚡ Identity, Firebase Authentication
- **Testing:** JUnit, Mockito
- **Tools:** Postman, Swagger

#### Databases

- **Relational:** Microsoft SQL Server, MySQL, PostgreSQL, SQLite, Azure SQL
- **NoSQL:** Firebase Firestore

#### DevOps & Tools

- **Version Control:** Git, GitHub
- **Containerization:** Docker
- **CI/CD:** Azure DevOps (CI/CD Pipelines)
- **Cloud Platforms:** Azure (for Application Deployment)

#### Mobile & Game Development

- **Mobile:** Android Development (Java/Kotlin), Android Studio
- **Game:** C#, Unity

#### Project & Team Collaboration

- **Methodologies:** Agile Methodologies, Scrum, Kanban
- **Tools:** Trello, GitHub Projects, Azure DevOps, Jira
- **Practices:** Code Reviews, Task Management, Documentation

### PROFESSIONAL EXPERIENCE

---

#### MacroVision Tech Agency ⚡

01/2025 – 04/2025

##### Frontend Development Intern

Beirut, Lebanon

- Developed and maintained the company's website using React.js, focusing on responsive design and usability.
- Built and optimized reusable UI components for performance and scalability.
- Integrated RESTful APIs to deliver dynamic and interactive user experiences.
- Enhanced overall UI/UX, improving accessibility and boosting user engagement across devices.

## EDUCATION

---

**University of Sciences & Arts Lebanon** 

Computer Science

GPA: 3.03

Key Coursework: Advanced Data Structure, Software Engineering and related studies.

09/2022 – 07/2025

Haret hrek, Lebanon

## PROJECTS

---

**PurrfectMatch** 

2025

*Pet Adoption Website*

Developed a comprehensive pet adoption platform connecting animal shelters with potential adopters using modern web technologies. Built scalable .NET 8 Web API backend with Clean Architecture pattern featuring 21 REST controllers, JWT authentication, and Entity Framework Core with SQL Server database. Created responsive React 19 frontend with TypeScript and Material-UI components utilizing Redux Toolkit for state management. Implemented real-time communication via SignalR for instant notifications, Stripe payment integration for donations, and advanced pet search functionality with filtering capabilities. Established robust DevOps pipeline with Azure CI/CD, comprehensive xUnit testing, and automated deployment workflows.

**Key Technologies:** .NET 8, React 19, TypeScript, Material-UI, Redux Toolkit, Entity Framework Core, SQL Server, SignalR, Stripe API, Azure Pipelines

**Seloger Real Estate Investment Analyzer**

2025

*Multi-Threaded Property Scraper & Investment Analysis Platform*

Developed a sophisticated multi-threaded property investment analysis platform that scrapes and analyzes French real estate data from Seloger.com . Implemented comprehensive investment calculators for Airbnb revenue prediction, rental yield analysis, and undervalued property identification across multiple French markets. Built high-performance web scraping system with token bucket rate limiting and concurrent processing achieving 30-70x speed improvements. Integrated advanced geospatial analysis using KDTree indexing and Haversine distance calculations for neighborhood comparisons and automated Excel report generation with detailed ROI projections and 3-15 year growth models.

**Key Technologies:** Python, Pandas, NumPy, SciPy, ThreadPoolExecutor, Geopy, RESTful APIs, Multi-threading, Data Analysis

**Bank Management System | Java Application**

2022

Developed a comprehensive banking application using Java and Swing GUI framework featuring complete account management, transaction processing, and client services. Implemented object-oriented design with abstract classes, inheritance, and polymorphism to support multiple account types (Credit/Debit). Built secure authentication system with PIN protection, custom exception handling, and real-time transaction tracking. Utilized serialization for data persistence and created intuitive user interface with 10+ GUI forms for seamless banking operations including deposits, withdrawals, transfers, and payment processing.

**Key Technologies:** Java, Swing GUI, Object-Oriented Programming, Exception Handling, Data Serialization

## CERTIFICATES

---

**Agile Foundations - Supportful** 

- Learned to design and implement Agile methodologies, specifically Scrum and Kanban, to optimize project workflows.
- Applied Jira for effective version management, task creation, and analysis of team performance metrics (e.g., speed/velocity).
