
SKILLS

- **Languages:** Python, Java, Kotlin, C#, PHP, C, MATLAB, Assembly (Intel 8086, MIPS)
- **Web Development:** HTML, CSS, JavaScript, ReactJS, Bootstrap, ASP.NET MVC, Responsive Design
- **Mobile Development:** Kotlin, Flutter
- **Databases:** MySQL, ROOM DB, LINQ, Database Design & Management
- **Tools & Platforms:** Git/GitHub, Linux, CI/CD, Agile Development
- **Concepts:** Algorithms & Data Structures, Software Engineering, Operating Systems

EDUCATION

Bachelor's in Computer Science

Lebanese University

November 2022 - July 2025

Master's in Computer Science

Lebanese University

Present

WORK EXPERIENCE

Front-End Development Internship – Elevvo Pathways

July 2025 - August 2025

- Delivered 8+ front-end projects, improving usability and functionality for client-facing dashboards and forms.
- Built responsive, cross-browser web apps with ReactJS, HTML, CSS, and JavaScript, reducing load times and enhancing user engagement.
- Implemented state management with Context API and optimized persistence with localStorage, improving app reliability and user experience.
- Strengthened expertise in component-based architecture, contributing to scalable and maintainable codebases.

PROJECTS

PropertyFinder - Real Estate Web Application

Technologies: PHP, HTML, CSS, JavaScript, MySQL

- Built a full-stack platform supporting property listings, search, and user authentication.
- Designed database schemas and optimized SQL queries for faster data handling.

Planify - Mobile Productivity Application

Technologies: Kotlin, XML, ROOM db

- Developed an intuitive task management app with persistent local storage.
- Created a comprehensive SRS document and UI wireframes to guide development.
- Focused on delivering a clean and intuitive UI, strengthening user-focused design skills.

Job Application Tracker- Web Application

Technologies: ReactJS, JavaScript, HTML, CSS, Context API, localStorage

- Built a responsive web app to track job applications with dashboards, forms, and CRUD operations.
- Used Context API and localStorage for state management and persistence, strengthening front-end and component-based skills.
