76455784

Tripoli, North Lebanon, 1300, Lebanon

Dynamic Angular Frontend Developer with 2 years of experience in Angular, HTML, and CSS. Skilled in building responsive, user-focused interfaces, integrating APIs, and writing modular code using OOP. Committed to clean design, performance, and continuous innovation in web development.

## Work Experience

### Front-End Developer

Feb 2023 - Feb 2025

[Jooler](#) | Lebanon, Bourj Hammoud

Built and maintained scalable Angular applications using TypeScript, SCSS, and modern UI principles. Developed reusable components, integrated APIs and Firebase, and delivered responsive, high-performance web and mobile apps with Ionic, animations, and advanced UI features like ag-Grid.

- Built responsive and user-friendly interfaces using HTML, CSS (SCSS), and JavaScript, leveraging Flexbox, Grid, and media queries for cross-device compatibility.
- Developed reusable UI components and integrated npm packages, significantly improving code reusability and reducing development time.
- Implemented complex data grids using ag-Grid, providing advanced visualization and manipulation capabilities.

## Projects

### Factory Jooler

Feb 2023 - Feb 2025

Factory Jooler is a B2B jewelry platform streamlining custom orders, 3DM requests, consignment, and design services. It features interactive tables for invoices, bills, and POs, enabling efficient management and collaboration between jewelers, manufacturers, and service providers.

- Angular
- Typescript
- Responsive Design
- Flexbox and Grid layouts

### ERP Jooler

Oct 2023 - Feb 2025

App Jooler is a jewelry-focused ERP platform that helps businesses manage inventory, orders, clients, and finances. It offers real-time data, smart workflows, and a user-friendly interface to streamline operations and improve decision-making

In the jewelry industry.

- AG-Grid Tables
- Forms
- Infinit Scrolling
- ERP System
