I am a third-year senior Computer Science student with a solid foundation in data structures, databases, operating systems, and networking. Eager to apply my knowledge and grow my skills in software development through real-world challenges and collaborative projects.

Projects

Inventory Management System – SaaS Platform

March 2025 – Present

- Built multi-tenant platform with Super Admin and client portals
- Real-time dashboard for live UI updates
- Built core modules including **Products, Stock, Customers, Suppliers, Warehouses, and Analytics**
- Implemented **monthly recurring billing** using Stripe subscriptions
- Integrated **JWT-based authentication and authorization** with role-based access control (RBAC)
- **Technologies:** HTML, CSS, JavaScript, React, Tailwind CSS, Recharts, .NET Core, LINQ, Stripe, OAuth 2.0

Foodle Restaurant

github.com/Mz876

- Built full-stack web app for restaurant management and customer interaction
- Created admin dashboard, email marketing, and map integration
- Integrated email marketing and Google Maps navigation
- Created admin dashboard, email marketing, and map integration
- **Technologies:** HTML, CSS, JavaScript, PHP, MySQL

Banking System

github.com/Mz876

Console Application that provides users with certain banking features such as admin logins, list clients, manage clients, search, and currency exchange.

Technologies : C++

Experience

Choroid Studios – Internship (Hybrid)

Jun 2024 – Aug 2024

- Built responsive, dynamic interfaces with React and Flutter
- Documented and tested RESTful APIs using OpenAPI specs and JSON
- Explored AI integration via LangChain framework

EDUCATION

B.Sc. in Computer Science, Lebanese International University (2022–2025)

Programming Advices Bootcamp – <https://programmingadvices.com>

TECHNICAL SKILLS

- Languages: C++, C#, Java, php, Dart, Js
- Frameworks: .NET, ASP.NET Core, LINQ, Entity Framework, Tailwind
- Databases: SQL Server, MySQL
- Libraries: React, React Mui, Recharts
- Tools: Git, Git-hub
