

RAZAN ZBIB

Aspiring Full-Stack Developer | UI/UX Designer | ML & Cloud Computing Enthusiast
Beirut, Lebanon | +961 81737963 | zbibrazan147@gmail.com | linkedin.com/in/razanzbib | github.com/razan-z

SUMMARY

Computer Science graduate with 1+ years of hands-on experience in full-stack web development. AWS Academy Cloud Foundations certified, with a strong foundation in building responsive, user-centered applications using ReactJS, PHP, JavaScript, and MySQL. Seeking to join a dynamic development team where I can contribute my front-end and back-end development skills and grow professionally. Skilled in API integration, clean code practices, and agile workflows. Successfully developed and deployed full-stack web applications with responsive design and real-time data integration.

EDUCATION

Lebanese University – Faculty of Sciences
B.S. in Computer Science

2021 - July 2024

LICENSES & CERTIFICATIONS

Employment Hub - Soft Skills Training

The Nawaya Network -2025

Completed training in AI literacy, CV & cover letter writing, interview preparation, public speaking, LinkedIn branding, and workplace readiness.

AWS Academy Graduate - AWS Academy Cloud Foundations

AWS - 2024

Gained foundational knowledge of core AWS services (EC2, S3, IAM, RDS), cloud deployment models, scalability, security, and best practices in cloud computing.

User Experience (UX Designs)

GIL North - 2022

Covered user research, wireframing, prototyping, color theory, and usability principles for creating intuitive and visually appealing designs.

PROJECTS

Digital Wallet Platform: Developed a complete web application with secure user and admin modules using vanilla PHP, MySQL, HTML, CSS, and JS. Implemented responsive design, clean architecture, API versioning, and secure login features.

WatchDiary: A full-stack, responsive web application built with ASP.NET, C#, JavaScript, and Bootstrap, designed for movie and TV show enthusiasts to discover, track, and manage their watchlist and personal viewing diary. The platform integrates with the TMDb (The Movie Database) API to fetch real-time data, including trending movies and shows. Features include dynamic content rendering and user authentication. Emphasis was placed on usability, scalability, and real-time data integration.

QR Code Generator: Built a web app that generates and downloads QR codes from URLs using HTML, CSS, and JavaScript. Integrated a third-party API via Axios for QR generation, with responsive design and clean UI. Demonstrates API usage, DOM manipulation, and front-end development skills.

SKILLS

Full Stack Web Development:

- Develop responsive and accessible web interfaces using HTML5, CSS3 (Flexbox, Grid, Bootstrap), and JavaScript (ES6+).
- Build full-stack applications using ReactJS for the frontend and PHP/MySQL for the backend.
- Integrate RESTful APIs using Axios and Fetch to enable seamless frontend-backend communication.
- Using version control with Git & GitHub.

UI/UX Design:

- Build interactive prototypes, wireframes, personas, and micro-interactions using Figma.
- Familiar with UX best practices, component systems, constraints, variants, and UI kits.
- Experience in testing, exporting assets, and preparing handoffs for developers/clients.

Data Science:

- Proficient in data analysis and visualization using Jupyter and Anaconda.
- Knowledgeable in machine learning concepts and techniques, with experience in implementing simple models for predictive analysis (classification, regression, clustering) in Jupyter notebook.

Mobile App Development:

- Skilled in using Android Studio and Java.
- Familiar with SQLite for local data storage.

AWS & Cloud Services:

- Familiar with core AWS services including EC2, S3, IAM, and RDS. Understands basic cloud architecture, deployment models, scalability, and security best practices.

Programming Languages and Libraries:

- C, HTML, CSS, JavaScript, Java, Python, PHP, MySQL, ReactJS, NodeJS.

Tools:

- AWS, Git, VS Code, Figma, Visual Studio, Android Studio, VirtualBox, Jupyter Notebook
