## Summary

I'm a third-year Computer Science student at the Lebanese University. I enjoy building websites and learning new technologies. I have experience with HTML, CSS, JavaScript, and I'm currently working on a full stack project using **Next.js**, **Spring Boot**, and **SQL**. I'm also learning **Flutter** with CAC to build mobile apps. I'm excited to join a real company where I can learn from a team and improve my skills.

## Skills

- **Web Development:** HTML, CSS, JavaScript, Next.js
- **Backend Basics:** Java, Spring Boot (currently learning)
- **Mobile Apps:** Flutter & Dart (currently learning)
- **Databases:** SQL, MySQL
- **Tools:** Git, GitHub, Fetch API, Postman (basic)
- Teamwork, Communication, Problem Solving
- Computer Architecture
- Graph Theory
- Image Processing

## Work / Projects

### Car Selling and Rental Website

*Frontend Developer – Group Project*

- Built a website using HTML, CSS, and JavaScript
- Made it responsive and added animations
- Used JSON and Fetch API to load car data
- Collaborated using GitHub
- <https://github.com/taniamkanna/selling-renting-cars>

### Full Stack Web App (In Progress)

- Using **Next.js** for frontend and **Spring Boot** for backend
- Connected with **PostgreSQL** for database
- Includes login, signup, and role-based accounts
- Learning how to build real backend systems

### Flutter Mobile App (In Progress)

- Learning Flutter with CAC
- Exploring how to build mobile UIs with Dart
- Practicing app structure and layouts

## Education

### Lebanese University – Bachelor in Computer Science

*Third Year Student – Tyre, Lebanon*

- Web Development
- Object-Oriented Programming (Java)
- Data Structures (C)
- Databases
- Operating Systems
- Networks
