SUMMARY

Computer Science graduate interested in AI and data analysis. I have experience building machine learning models, working with data in Python, and finding patterns in datasets. I am excited to use my skills in an AI and Data Analyst trainee role and learn while helping with real projects.

WORK EXPERIENCE

AI and Data Analysis Trainee, Eurisko.

2024

- Gained foundational skills in NumPy and Pandas for data manipulation and preprocessing
 - Learned to perform Exploratory Data Analysis (EDA) to identify trends, correlations, and outliers
 - Applied and compared multiple supervised learning models to find the best fit for labeled datasets
 - Tackled unsupervised learning tasks on unlabeled data (models used to be confirmed)
 - Introduced to Computer Vision workflows and applications
 - Completed a final project
-

PERSONAL EXPERIENCE

AI Model

- Built and deployed multiple AI models for tasks such as classification, prediction, and data.

Website

- Designed and developed a visually appealing website using HTML, CSS, Javascript and PHP
-

EDUCATION

Holy Spirit University of Kaslik(USEK), Lebanon

2021 - 2025

B.S. Computer Science, Faculty of Arts and Sciences

College Des Apotres, Jounieh

2021

Lebanese Baccalaureate , Life Science

TECHNICAL SKILLS

- **Programming:** C++, Java, Python, PHP, JavaScript, HTML, CSS, SQL, React, React Native
- **Database Management:** Database Systems, Database Administration.
- **Data & AI:** Machine Learning, Data Analysis
- **Databases & Systems:** SQL Databases, Operating Systems, Computer Networks
