Projects

Apple Store | [Link](#) Apr 2025 – Jul 2025
A modern, mobile-friendly e-commerce web application about Apple's products, built using the MERN stack.

- Showcases various iPhone models in a sleek UI
- Implements shopping cart functionality (add/remove items, quantity update)
- User authentication using **JWT** and **cookies**
- Integrated **Stripe** for secure online payments, enabling users to complete purchases directly through the application

World Explorer | [Link](#) Feb 2025 – Mar 2025
A fully responsive country data explorer built with **React** and **TypeScript**, powered by the **REST Countries API**.

- Live search by country name, region, or subregion
- Dynamic routing with detailed country pages
- Includes neighbour-country navigation feature

Portfolio Website | [Link](#) Jul 2025 – Aug 2025
A personal portfolio website designed to highlight my skills, projects, and experience as a full-stack developer. Built with **React**, the site offers a clean, modern interface and is optimized for performance and responsiveness.

- Showcases my projects with live demos and GitHub links
- Features a responsive layout with cool animations
- Includes sections for About Me, Skills, Projects, and Contact

Education

- **B.Sc. Computer Science**, Lebanese University. Jan 2023 – Jul 2025
- **SG**, Hassan Al Hajje High School 2021-2022

Languages

- **Arabic:** Native
- **English:** Intermediate
