Objective :

To join a professional team where I can enhance my programming and technical skills, apply my knowledge to real projects, and contribute innovative ideas and practical solutions that support the team's goals.

Education :

Lebanese University

BS in Computer Science

Currently pursuing M1 Software engineer

Tripoli – Lebanon

2023 – 2025

- **Related Course Work :** Data Structures & Algorithms, Computer Organization & Programming, Object-Oriented Programming, Statistics & Applications, machine learning

Experiences :

Social Media Marketing – Intern (On-Site, DOT Lebanon)

Oct 2024 – Dec 2024

- **Designed marketing** materials using **Canva** and created a **logo** with **Figma** to **support brand identity**.
- **Created** and **organized** social media content across Instagram, Facebook, TikTok, and WhatsApp.
- **Analyzed** performance metrics and **optimized strategies** to boost audience engagement.
- **Collaborated** with **teams members** to support marketing and communication activities.

Data Entry (Contract Based | Remote, Talent Beyond Boundaries)

Feb 2025 - Jul 2025

- **Entered, organized, maintained** data using relational DB & Google Sheets with strong attention to detail.
- **Collaborated** with team members through **Slack** to validate information and **support** daily operations.

Sales Manager (On Site, Our prices Foundation)

July 2018 - Oct 2020

- **Managed client communication** and **supported daily sales operations**.
- **Built strong relationships** with customers through effective communication and follow-up.
- Assisted in identifying sales opportunities and improving customer engagement.
- **Collaborated** with team members to support marketing and business activities.

Mobile Developer Intern - Xpertbot (Remote)

July 2025 - Sept 2025

- Developed and maintained mobile applications using **Flutter**.
- Implemented features such as **authentication** profile management and **API integration**.
- **Collaborated** with the **development team** to **test, debug, and optimize** performance.
- Gained practical experience in **State Management** and **Restful APIs**.

Backend Developer Intern - Eurisko (On-Site)

Feb 2026 – April 2026

- Backend internship focused on **modern backend architecture** and **scalable system design**.
- Gained hands-on exposure to **Node.js**, **Express.js** and **Nest.js** with strong understanding of backend architecture principle and **API** development.
- Worked with **advanced SQL concepts**, built knowledge in **MongoDB** including **aggregation pipelines** and **NoSQL fundamentals**.
- Explored **caching strategies**, **microservices architecture**, **Domain-Driven Design (DDD)** and **Event Streaming in distributed systems**.

Projects :

Food Website – Personal Project

Nov 2023 - Dec 2023

Frontend Developer

- **Designed** and **developed** a responsive food website showcasing international cuisines.
- **Built structured** recipe pages with ingredients and step-by-step instructions to enhance learning experience.
- **Implemented** a **user-friendly** and **responsive UI** to ensure accessibility across different devices.

- **Managed the full project lifecycle**, including **design, development** and **content organization**.
- Focused on **clean UI, intuitive navigation** and **improved user experience**.

Sport Booking Web Application – Academic/Personal Project

Feb 2025

Full Stack Developer

- **Developed** a web application for **booking** and **managing sports sessions**.
 - **Implemented** features to **create** and **manage** sports sessions, including sport name, schedule, duration, and available days.
 - **Built dynamic interfaces** to display, update and manage scheduled sessions.
 - **Implemented** session deletion functionality and secure user authentication(sign-up).
 - Integrated a **React**-based frontend with **PHP** backend to ensure full-stack functionality.
- Technologies** : React , JavaScript, PHP

CityConnect – Hackathon Project:

Dec 2025

Frontend Developer

- **Developed the frontend** of a municipal platform enabling citizens to report local issues such as road damage, traffic congestion, and infrastructure problems.
- Built **responsive** and user-friendly interfaces for submitting issue details and uploading images.
- **Collaborated with team members** to integrate frontend components with backend services and APIs.
- Focused on **usability, accessibility** and **intuitive user flow** to improve communication between citizens and municipalities. Project built with **React**.

FemaleCoffee Website – Software project

Feb 2026 – April 2026

Full Stack developer

- **Developed a responsive** and **reusable website** template allowing users to customize content, images, and layout it without coding knowledge.
- **Built a full-featured web application** for browsing products, place orders and managing a shopping cart.
- Implemented dynamic pricing logic with total calculation based on selected items and quantities.
- **Developed** an event management feature allowing users to view, join, and reserve spots for coffee events.
- Designed a promotional system where users receive discounts based on number of orders.
- **Technologies I used:** React, Nodejs, CSS tailwind.

Skills :

Programming Language : Java , SQL, JavaScript, html, CSS ,PHP , MySQL , React, NodeJS, C#, python.

Problem Solving[LeetCode]: solved multiple algorithmic problems focusing on data structures and algorithms, including arrays, strings, hash tables and basic sorting/searching techniques.

Soft skills: Communication, Organization, Teamwork, Time Management, Problem solving.

Languages :

Arabic(native)

French(intermediate)

English(advanced)
