Objectives

Computer Engineering graduate with strong skills in **software development, database management, and electronics**. Experienced in building **desktop, mobile, and web applications** using Java, PHP, JavaScript, HTML, CSS, and SQL. Skilled in **hardware and network troubleshooting**, with hands-on experience in designing digital circuits and embedded projects. Recognized for problem-solving, adaptability, and delivering practical technical solutions.

Education

- **Bachelor of Science in Computer Engineering** – Lebanese International University
- **BT in Electronics** – Al Afak Institute

Projects

Software Development

- **Smart E-Commerce Platform for Automotive Essentials**
Designed and developed a full-stack web platform with product browsing, customer registration, shopping cart, and order management. Built with HTML, CSS, PHP, JavaScript, and MySQL. Improved skills in **web development and UI/UX design**.
- **Airplane Ticket Booking System (Java + MySQL)**
Created a desktop application for managing flight bookings and passenger information with database integration.
- **Travel Agency Management System (Java)**
Developed a booking management application to streamline agency operations.

Electronics & Digital Systems

- Designed and implemented an **Active Low Pass Filter Circuit**.

- Built a **2-bit Arithmetic Logic Unit (ALU)** supporting increment and rotate-left operations.
- Designed an **OR Gate using transistors**.

Technical Skills

- **Programming & Development:** Java, PHP, JavaScript, HTML, CSS, SQL, Android
- **Database Management:** MySQL
- **Networking & Hardware:** Troubleshooting hardware & network issues
- **Tools & Software:** Microsoft Office (Word, Excel, PowerPoint)

Languages

- **Arabic:** Native
- **English:** Fluent

Soft Skills

- Strong problem-solving and analytical skills
- Ability to work independently or in a team
- Excellent time management and adaptability
