## Objective

Motivated Computer Science graduate with hands-on experience in ERP systems, mobile development, and backend technologies. Seeking a challenging role to leverage development, troubleshooting, and system support skills in a forward-thinking company.

---

## Experience

### IT Consultant

#### Najjar Stores | Jun 2025 – Present

---

- Designed and deployed problem-solving software tailored to store operational needs whilst working with OMEGA POS system for Data entry and Invoices
- Provided end-to-end IT support, troubleshooting hardware and software issues across store systems.
- Reviewed, validated, and managed inventory and sales data inputs across digital platforms.
- Managed the online web store and implemented improvements for customer experience and backend performance.

#### ERP Intern – Microsoft Dynamics 365 Business Central

##### *Coders | Jan 2025 – Mar 2025*

---

- Collaborated on full ERP deployment, developing extensions and reports using AL and Visual Studio Code.
- Migrated data via Excel, SQL, and PowerShell, ensuring accuracy and performance.
- Maintained and tested MySQL database records.
- Prepared technical documentation and assisted in troubleshooting.

### Retail Sales Associate

##### *Al-Khayyat Store | 2020 – 2024*

---

- Exceeded sales targets through personalized product recommendations.
  - Resolved customer issues promptly, maintaining high satisfaction rates.
  - Supported inventory management and visual merchandising.
- 

## Projects

### Civil Safety Android App with AI Assistant (Award-Winning)

- Developed a mobile safety app with real-time data and media uploads using Android Studio and Firebase.
  - Designed UI and managed backend integrations, implementing local server communication.
  - Created a custom AI model for interactive user assistance.
- 

## Education

Bachelor of Science in Computer Science, Arab Open University | 2022 – 2025

Relevant Coursework: Software Engineering, Web Development, Databases, Data Structures

---

## Technical Skills

- **Back-End:** C#, Ruby on Rails, Python, Kotlin, Java, Microsoft AL (extensions and reporting in 365 Business Central)
  - **Front-End:** HTML, CSS, JavaScript, React, Swift
