Profiles

Ali Mehhydeen

Summary

Motivated software developer with a passion for writing code and developing websites, mobile apps, and Windows applications. A fast learner, particularly in the development field, with a keen interest in enhancing my career and expanding my knowledge across multiple platforms.

General Experience

- AHMAD HIBRI & CO, Beirut**
beirut
September 1,2022
Developed and implemented sales strategies to increase revenue.
Increased overall revenue by identifying upselling opportunities and presenting relevant product offerings to existing clients.
Coordinated onboarding efforts for new team members, providing mentorship and guidance as they acclimated to their roles.
Communicating with customers over the phone and offering them the best sales deals
Completing paperwork such as sales invoices and post-sale auditing.
- WASILLAK DELIVERY COMPANY - BEIRUT, LEBANON**
beirut
It is my responsibility as a manager to ensure that every employee received the required training and that their performance is monitored to satisfy quality standards and provide excellent customer service.

Education

- Lebanese International University**
Bachelor of Computer Science
Computer Science

Projects

- Mental Health Website**
A comprehensive platform designed to offer support, resources, and guidance to those seeking help with their mental well-being.
- LIU GYM Website**
The LIU Gym website was developed as an online platform dedicated to enhancing the experience for gym members and administrators at the Lebanese International University (LIU). The site offers a user-friendly interface that allows members to easily access information about gym schedules, available classes, and personal training sessions. Additionally, it features an integrated booking system for reserving gym facilities and equipment. The site also provides an admin dashboard for managing memberships, tracking attendance, and updating class schedules, thereby streamlining gym operations and improving overall user engagement.
