PROFESSIONAL EXPERIENCE

Rekt Studios | Lebanon | On-site

Quality Assurance Engineer / Head of QA Dept.

Oct 2024 - Present

- Led cross functional testing teams, planned testing activities, and managed resources to ensure on time project delivery
- Automated web applications using Selenium WebDriver with Java, TestNG framework, and IntelliJ for efficient test execution
- Implemented various locator strategies including ID, Name, XPath, and CSS Selectors to reliably identify web elements across different scenarios
- Automated complex user workflows including login, registration, and critical business processes to reduce manual testing effort
- Applied synchronization techniques such as implicit waits, and explicit waits to handle dynamic content and ensure stable test execution
- Automated Ajax calls, child windows, pop ups, and IFrames for comprehensive end to end testing coverage
- Performed functional testing with Selenium across multiple browsers to verify business requirements and user scenarios
- Conducted smoke, regression, exploratory, and usability testing regularly to maintain product quality
- Performed detailed manual testing across web and desktop platforms with strong attention to detail
- Created and organized test cases in Google Sheets for complete test coverage and traceability
- Ran browser compatibility testing to ensure consistent behavior across major browsers
- Performed UI and UX testing to ensure clean design, smooth user flow, and responsive behavior across different screen sizes
- Reviewed designs in Figma to catch issues early and ensure final products matched expectations
- Performed API testing with Postman to verify web services and backend functionality
- Tested backend input validation for authentication endpoints to ensure secure data handling
- Conducted basic security testing including identifying vulnerabilities and suggesting remediation fixes
- Used Burp Suite to analyze website traffic and identify potential security issues

- Reported and tracked bugs using ClickUp to ensure proper resolution and closure
- Maintained clear communication with developers and project managers for fast issue resolution and continuous improvement
- Collaborated with developers to identify root causes of major issues and implement permanent fixes
- Suggested technical improvements and supported long term quality enhancements
- Tested game features focusing on performance and user experience, particularly in action and crypto gaming applications
- Contributed to quality improvement efforts throughout all product development stages

Softavia | Lebanon | Remotely

Quality Assurance Specialist

Mar 2023 - July 2024

- Creating detailed, comprehensive and well-structured test plans and test cases.
- Reviewing quality specifications and technical design documents.
- Analyze product features and suggest changes to enhance.
- Creating technical documentation and business rules diagrams for reference and for simplifying testing.
- Test sprint's stories based on documented test cases, business rules and data matrix provided by business analyst and design screens provided by UI/UX designers.
- Estimating, prioritizing, planning and coordinating quality testing activities
- Performing thorough regression testing.
- Identifying, recording, documenting thoroughly and track bugs.
- Using Jira as management and bug reporting tool.
- Work alongside with full agile team.
- Strictly following agile methodology.

Freelance

Front End Developer

Jan 2023 - May 2023

- Working with customers to create simple websites or fixing existing websites.
- Review the provided UI/UX design files (Zeplin, Figma) with designer's collaboration.
- Developing and implementing front-end architecture using ReactJs framework.
- Design multiple dynamic and browser compatible pages using HTML5, CSS3, JavaScript
- Setting up the development environment, including visual code editor, git version control and any necessary tools or libraries.
- Ensure website responsiveness and cross browser compatibility.

Integrity

Bug Bounty Hunter

Dec 2022 - Present

- Responsibility of preventing abuse of sites
- Using passive recon to use public available resources like google, social media, DNS records.
- Using active recon to use tools like Nmap, Shodan to scan for open ports, and potential vulnerabilities.
- Using Burp Suite to identify vulnerabilities and assess the security posture of web application.
- Manual testing to identify logical flaws, authentication bypasses, SQL injection, XSS.
- Reporting vulnerabilities

Family Business | US | Remotely

Ecommerce Manager

April 2020 - May 2022

- Created an e-commerce website on Shopify linked to e-bay.
- Managing all listings. Auditing, editing, adding, pricing, customer service.
- Handle communication in general with Shopify + e-bay
- Studying the market everyday to monitor the prices and new items release.
- Managing the store and website through Shopify, to ensure quality, and monitor activity.

EDUCATION

Udemy

- **The Complete 2024 Software Testing Bootcamp**
- **React - The Complete Guide (React Hooks, React Router, Rest API, Redux, Styling)**
- **Bug Bounty Hunting & Web Security Testing** (Information Disclosure, Broken Access Control, API Enumeration, Path Traversal, HTML, SQL & Command Injection, CSRF, IDOR & BL, OAUTH 2.0, XSS, SSRF, XML & XXE, LFI & RFI)

Coursera

- **Basics of Web Development & Coding Specialization** (HTML5, CSS3, Interactivity with Javascript, Advanced Styling with Responsive Design)

La Trobe Melbourne University - Australia

English Language (Writing, Listening, Reading, Presentation)

Emergency Medical Technician EMT - United States (US)

CPR and MORE (CPR, ECG, BLS, General First Aid)

OTHERS

Languages: Arabic (Native) , English (Proficient) , Turkish (Beginner)

Tools: Github, ClickUp, JIRA, Figma, IntelliJ, Visual Code, Burp Suite, Kali Linux, Postman

Hard Skills: Java, HTML, CSS

Soft Skills: Problem Solving, Teamwork, Communication, Agile/Scrum Environment
